c. 2

## FOREWORD

This publication was prepared to meet the many requests for specific county data from the 1969 U.S. Census of Agriculture obtained by the Bureau of Census. The items included are those most commonly requested by counties. Information on many other items is available from the 1969 Census of Agriculture (county data for New York in Volume 1, part 7) published by Bureau of Census, U. S. Department of Commerce. Data for Bronx, Hamilton, Kings, New York and Richmond counties are not available separately but are included in state totals.

This is the first U.S. Census of Agriculture conducted primarily by mail. The mailings were made during the last week of December 1969. Information collected was intended to cover production, sales and expenditures in the full year 1969, and livestock on hand as of December 31, 1969. Operators of farms with an expected volume of sales of agricultural products in 1969, of \$2,500 or more were sent the detailed Agricultural Census Report form, while a shorter version was sent to a 50 percent sample of operators whose sales were expected to total less than \$2,500. Therefore, information for some items is limited to Class 1-5 farms.

"Farms," defined in the 1969 census exactly as in 1964, are places on which agricultural operations were conducted at any time during the census year under the control of an individual management. Places of less than 10 acres were counted as farms if the sales of agricultural products for the year amounted, or normally would amount, to at least \$250. Places of 10 or more acres were counted as farms if the sales of agricultural products for the year amounted, or normally would amount, to at least \$50.

Farms in the top five economic classes (page 2) are those for which sales of farm products in 1969 amounted, or normally would amount, to at least \$2,500. Abnormal farms such as Institutional or experimental farms are excluded from the Class 1-5 farms but are included in all farms. The combined number of part-time, part-retirement and abnormal farms are listed as other farms on page 2.

The U. S. Census of Agriculture, taken every fifth year, provides much detailed agricultural information by counties. Current agricultural statistics are also needed to reflect up-to-date trends in New York agriculture. The New York Crop Reporting Service issues a number of statistical reports during the year pertaining to crop and livestock production, livestock inventory numbers, and related agricultural facts. Estimates in these reports relate mainly to the State as a whole and are based primarily on sample surveys of farm operations and agri-businesses. Information as to availability of periodic statistical reports may be secured by writing to the New York Crop Reporting Service, c/o Department of Agriculture and Markets, State Campus, Albany, New York 12226.

Wm. I. BAIR  
Agricultural Statistician in Charge

### Leading Counties for Selected Items, 1969

Item	First	Second	Third	Fourth	Fifth
Farms	Chautauqua	St. Lawrence	Steuben	Erie	Niagara
Cattle and calves	St. Lawrence	Jefferson	Delaware	Oneida	Otsego
Milk cows	St. Lawrence	Jefferson	Delaware	Oneida	Otsego
Chickens	Sullivan	Ulster	Wayne	Orange	Erie
Corn for grain, acres	Cayuga	Ontario	Livingston	Onondaga	Genesee
Corn for silage, acres	Washington	Jefferson	Wyoming	St. Lawrence	Madison
Wheat, acres	Ontario	Genesee	Livingston	Monroe	Cayuga
Oats, acres	Steuben	Jefferson	Cayuga	Seneca	Ontario
Dry beans, acres	Livingston	Ontario	Genesee	Cayuga	Monroe
Potatoes, acres	Suffolk	Steuben	Wyoming	Wayne	Genesee
Hay, acres	St. Lawrence	Jefferson	Steuben	Otsego	Oneida
Vegetables for sale, acres	Erie	Orleans	Genesee	Orange	Ontario
Apple trees	Wayne	Ulster	Niagara	Orleans	Columbia
Pear trees	Wayne	Niagara	Columbia	Ulster	Orleans
Tart cherry trees	Wayne	Orleans	Niagara	Monroe	Chautauqua
Grapes, acres	Chautauqua	Yates	Steuben	Erie	Ontario

STATISTICS FROM THE 1969 U. S. CENSUS OF AGRICULTURE  
IN NEW YORK STATE, BY COUNTIES
